INFORMATION REGARDING OTHER RIGHTS AND RESPONSIBILITIES CONCERNING CREMATIONS

The declarant or authorizing agent(s) shall carefully read and understand the following statements before signing this authorization. The declarant or authorizing agent(s) shall complete the segment directing the final disposition of the cremated remains. The crematory authority shall not conduct any cremation nor accept a body for cremation unless it has a Cremation Authorization, Form CR-1 signed by the declarant or authorizing agent(s) clearly stating the final disposition.

- 1. **All cremations are performed individually.** It is unlawful to cremate the remains of more than one individual within the same cremation chamber at the same time.
- 2. The consumer may choose cremation without choosing embalming services. If the crematory does not have a refrigerated holding facility it shall not accept human remains for anything other than immediate cremation.
- 3. The consumer is not required to purchase a casket for the purpose of cremation. The crematory authority requires that the body of the declarant or decedent be delivered for cremation in a suitable, closed container. The container shall be either a casket or an alternative cremation container, but the crematory authority shall not require that the body be placed in a casket before cremation or that the body be cremated in a casket, nor shall a crematory authority refuse to accept human remains for cremation because they are not in a casket. The container in which the body is delivered to the crematory for cremation shall:

 1) be composed of readily combustible materials suitable for cremation; 2) be able to be closed to provide a complete covering for the human remains; 3) be resistant to leakage or spillage; and 4) be rigid enough to support the weight of the declarant or decedent. The crematory authority may inspect the casket or alternative container, including opening it if necessary. The crematory authority shall not accept for holding a cremation container from which there is any evidence of leakage of the body fluids from the human remains in the container. Type of casket or alternative container selected:
- 4. Due to the nature of the cremation process, any personal possessions or valuable materials, such as dental gold or jewelry (as well as any body prostheses or dental bridgework), that are left with the declarant or decedent and not removed from the casket or alternative container prior to cremation shall be destroyed or shall otherwise not be recoverable unless authority to do so otherwise is specifically granted in writing. As the casket or alternative container will usually not be opened by the crematory authority to remove valuables, to allow for final viewing or for any other reason unless there is leakage or damage, the authorizing agent(s) understands that arrangements must be made to remove any possessions or valuables prior to the time the declarant or decedent is transported to the crematory authority.
- 5. Cremated remains shall not be contaminated (to the extent possible) with foreign material. All non-combustible materials (insofar as possible), such as dental bridgework, and materials from the casket or alternative container, such as hinges, latches, nails, etc., shall be separated and removed (to the extent possible) by visible or magnetic selection and shall be disposed of by the crematory authority with similar materials from other cremations in a non-recoverable manner, so that only human bone fragments and organic ash, including both human remains and container remains, remain unless those objects are used for identification or as may be requested by the authorizing agent. As the cremated remains often contain recognizable bone fragments, unless otherwise specified, after the bone fragments have been separated from the other material, they shall be mechanically processed or pulverized, which includes crushing or grinding into granulated particles of unidentifiable dimensions, virtually unrecognizable as human remains, prior to placement into the designated container. While every effort will be made to avoid commingling of cremated remains, inadvertent or incidental commingling of minute particles of cremated remains from the residue of previous cremations is a possibility, and the authorizing agent(s) understands and accepts this fact.
